

DOSENSIO *Zoom*

Enhancing Your SharePoint Experience

Designed for users of Microsoft SharePoint, DOSENSIO Zoom is a solution which simplifies access and management of corporate documents. The product is as simple and convenient to use as Windows Explorer. DOSENSIO Zoom increases user productivity, reduces user training, and decreases the burden on IT support and maintenance. As a result, DOSENSIO Zoom maximizes ROI on Microsoft SharePoint investments and improves the bottom line.

SharePoint + DOSENSIO *Zoom*

Features:

- Familiar user interface through Windows Explorer
- Automatic document synchronization to user's desktop and Microsoft SharePoint
- Ability to manage documents as local files and folders
- Side-by-side deployment with Microsoft SharePoint portal
- Preserves Microsoft SharePoint access security
- Faster access to large documents
- Online and offline document access
- Drag & Drop support
- Simple, fast installation
- No server deployment

Benefits:

- **Increases adoption** rates through familiar interfaces and workflows
- **Reduces investments** in server scalability through utilization of document caching on the desktop
- **Minimal training and IT support** efforts through familiar, intuitive user interface
- **Improves performance** by caching documents for subsequent access
- **Increases productivity** through user-centered design
- **Reduces complexity** while enhancing the functionality of SharePoint
- **Maximizes ROI** on SharePoint investments

SIMPLE

The Windows Explorer interface enables users to leverage Microsoft SharePoint immediately, bypassing the need to access web portals.

FAST

Intelligent caching eliminates wait and load times when searching for, editing, saving, or updating documents.

OFFLINE

Automatic two-way synchronization allows users to access, manipulate, and create documents even without internet connectivity.
